

Recognition List

IVQs in Motor Vehicle Engineering (3905)

Recognition List

IVQs in Motor Vehicle Engineering (3905)

Higher education

Institutions listed in this document are examples of universities and management institutes which have recognised the IVQ's in Motor Vehicle Engineering as meeting the level of skills and knowledge required for entry into relevant undergraduate degree programmes, with the possibility of exemptions.

Recognition means that applications from holders of appropriate certificates will normally be considered for admission, provided that all other academic and non-academic requirements, including their English language proficiency, are met.

Successful completion of levels indicated in the list does not guarantee admission.

Professional associations

Professional associations listed here have recognised City & Guilds IVQs in Motor Vehicle Engineering for membership purposes or as granting exemptions from certain professional examinations.

Employers and employer associations

IVQs are highly respected by employers as evidence of international competence. Many organisations have successfully used our international awards as part of their training or staff development programme.

Employer associations have also recognised IVQs as a benchmark to improve skills standards in the industry.

Higher education

United Kingdom

The University of Durham **Advanced Technician Diploma** **Technician Diploma**

The University welcomes applications from holders of a Technician Diploma or Advanced Technician Diploma. All such applicants will be treated on an individual basis, and considered on the merit, not only for entry itself, but also for any form of accreditation of prior learning or Advanced Standing which might be appropriate.

All Engineering programmes require evidence of performance in Maths to the equivalent of at least grade B at A level.

www.dur.ac.uk

Sheffield Hallam University **Advanced Technician Diploma** **Technician Diploma**

The University welcomes applications from individuals holding the Technician Diploma for entry to the first year of appropriate degree programmes.

The University would also consider holders of the Advanced Technician Diploma for entry with advanced standing, that is to the second and third levels of the appropriate degrees.

All applications would be considered on an individual basis and, as with all vocational qualifications, the University will reserve the right to request additional qualifications to ensure that the applicant is appropriately prepared for the demands of degree level study.

Hong Kong

Macau Institute of Management Advanced Technician Diploma

Holders of the Advanced Technician Diploma in Motor Vehicle Engineering wishing to pursue further study with the Macau Institute of Management in the Bachelor of Business Administration programme (Chinese BBA) will be given a 40% block exemptions.

Further exemptions may be granted, and all applications will be dealt with on an individual basis.

www.mma.org.mo

Macau Institute of Management (MIM) is the academic arm of the Macau Management Association. It is also a registered and recognised Higher Education Institution in Macau. Established in 1988, the Institute has been actively taking part in the training of management executives in Macau.

At present the Institute is offering a wide range of academic programmes, leading to qualifications recognised by the Macau SAR Government.

Professional associations

The Engineering Council (UK) Examinations Advanced Technician Diploma Technician Diploma

Holders of an Advanced Technician Diploma are eligible to register at the Graduate Diploma level of the Engineering Council Examinations.

Holders of a Technician Diploma are eligible to register at Certificate level.

www.cityandguilds.com/ecukexams

The Engineering Council (UK) is the national registration authority for professional engineers, working in partnership with 35 professional engineering institutions. It promotes and regulates the engineering profession in the UK to maintain a world-class engineering workforce and a standard against which overseas professional engineers are judged.

The Engineering Council (UK) runs the Register of Chartered Engineers, Incorporated Engineers and Engineering Technicians, and offers the Engineering Council Examinations.

The exams are available at three distinct and progressive levels (Certificate, Graduate Diploma and Postgraduate Diploma), and provide a progressive route for career development for those who are unable or have chosen not to complete a degree programme.

Institution of Incorporated Engineers (IIE)

Advanced Technician Diploma

Technician Diploma

The Institution of Incorporated Engineers (IIE) welcomes applications for membership from holders of an Advanced Technician Diploma or a Technician Diploma.

Subsequently, those who apply for registration with the EC(UK), Individual Case Procedure (ICP) is applied. This requires that the intending registrant provides details of the content of the courses undertaken and the performance or outcome attained, in each case.

A holder of a Technician Diploma is normally eligible to become a member of IIE (MIIE), and may subsequently register as an Engineering Technician (EngTech) once competence and commitment requirements have been satisfied.

A holder of an Advanced Technician Diploma is also normally eligible to become a member of IIE (MIIE), and partially satisfies the educational base requirement for registration as an Incorporated Engineer. A holder of this award who undertakes further learning – equivalent to the final year of a relevant Bachelor's degree – will be eligible to register as an Incorporated Engineer (IEng), subject to ICP. A successful Professional Review of competence and commitment is also required.

Note:

Accredited qualifications do not require the holder to be assessed through ICP. However, under the terms of its license from the EC(UK), IIE cannot accredit qualifications in isolation, only at the invitation of a college or University where the qualifications are delivered. Negotiations have also started in an effort to agree a suitable set of criteria to make the accreditation of City & Guilds IVQs much more straightforward.
